

Sorter is the first and only company in Poland and Central and Eastern Europe manufacturing complete technological lines for sorting, packing and palletizing. Sorter offers a full range of solutions for fruit and vegetable sector.

MONO SORTING MACHINE

One lane MONO electronic sorting machine is dedicated to sorting ball - shaped fruits and vegetables.

Due to its low price and uncomplicated design, the machine is applied mainly in small and medium orchard farms. Its efficiency ranges up to 3 tons/h.

The installed roller drop system conveys the sorted product from the side to one of 6 receiving tables, which can be equipped with electronic weights. MONO machine can be also equipped with an automatic bin tipper or a roller conveyor.

TECHNICAL DATA:

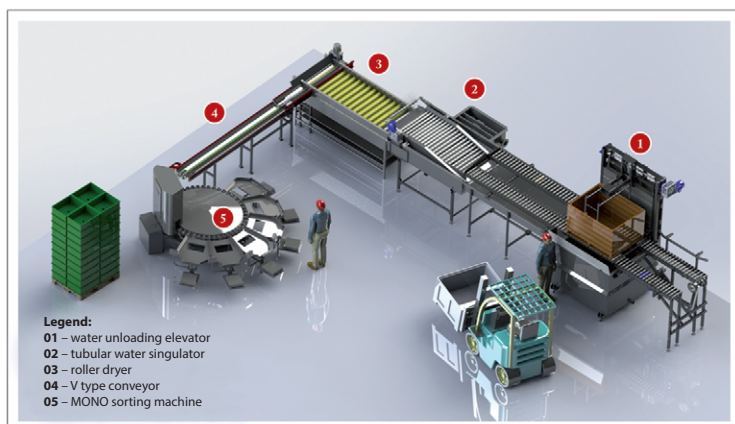

PURPOSE / APPLICATION	electronic sorting of fruits and vegetables
PRODUCT	ball-shaped fruits and vegetables
POWER CONSUMPTION	0,75 kW
POWER	3 x 400 V 50 Hz
BASIC SORTING PARAMETERS	diameter
OPTIONAL SORTING PARAMETERS	<ul style="list-style-type: none"> • weight module • colour module

FUNCTIONAL FEATURES:

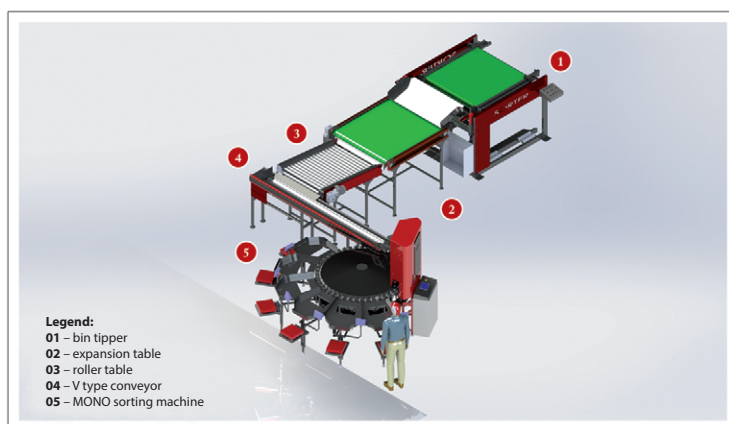

- efficiency up to 3 tons per hour
- exits number 5 + 1
- small overall dimensions 4 x 6 m
- soft brushes that protect fruits against damages
- cellular protectiv fabric made of certified material
- the electronic control panel
- roller – drop system

EXEMPLARY ONE LANE MONO LINES

WATER UNLOADING - ELEVATOR

DRY UNLOADING - BIN TIPPER
