

FUJI SEPTEMBER WONDER® FIERO

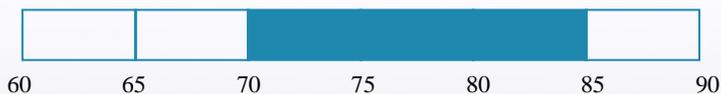

Château de Noue
02600 VILLERS-COTTERETS (France)
Tel.: +33 (0)3 23 96 56 50
Fax: +33 (0)3 23 72 75 52
E-mail: pepival@pepival.com

ORIGIN: sport of Fuji, USA

- Breeder: CNO
- Licence holder: INN Europe

PICKING DATE: 4 weeks before Fuji (as for Golden Delicious)

FRUIT SIZE (mm):

BLOSSOM DATE: late (as Fuji)

POLLINATED BY:

- Gala, Golden Delicious, Granny Smith, Elstar
- 50% Malus Golden Gem + 50% Malus INRA® Baugene®

POLLINATOR FOR:

Gala, Golden Delicious, Elstar

TREE TYPE: type III (Golden delicious)

GROWTH: strong (choose M9 Pajam®1 Lancep, M9T337 or M9 NAKB)

PRODUCTIVITY:

- Time till first cropping: rapid
- Yields: good
- Susceptibility to alternate bearing: as for Fuji
- Thinning: rather difficult

SUSCEPTIBILITY / RESISTANCE TO DISEASES:

- Average susceptibility to scab
- Low susceptibility to mildew and fire blight

FRUIT:

- Skin: the most coloured of the early Fuji sports
- Flesh: crisp, juicy and fine
- Taste: very sweet if the crop load is not too heavy. One of the sweetest early sports of Fuji.

STORAGE:

- Cold storage: February
- CA storage: March

USES:

- Early sales of Fuji
- The standard maturity Fuji types have a better colour and storage potential.

NOTES:
